Time you have to complete the challenge:
- 7 Calendar Days
- You can stop after 4 hours on the challenge, and let us know your conclusions.

What we are looking for:
- We don't expect a full-on production ready solution
- To know why you chose your solution you arrived at you solution (we want to see your code)
- To know if you are satisfied with your solution and what else you would do to make it better

The data set:
- https://www.kaggle.com/barelydedicated/bank-customer-churn-modeling

The Expected output:
- Given a Bank customer, can we build a classifier which can determine whether they will leave or not?
